## Response to Arguments

1. Applicant's arguments filed May 12, 2003 have been fully considered but they are not persuasive.

Regarding Applicant's argument with respect to Official Notice, the MPEP 2144 states: To adequately traverse such a finding, an applicant must specifically point out the supposed errors in the examiner's action, which would include stating why the noticed fact is not considered to be common knowledge or well known in the art. See 37 CFR 1.111(b). See also Chevenard, 139 F.2d at 713, 60 USPQ at 241 ("[I]n the absence of any demand by appellant for the examiner to produce authority for his statement, we will not consider this contention.").

Regarding Applicant's argument that the combination of Massiglia and Khosrowpour produces a seemingly inoperative device, the Applicant has interpreted the combination of the references as bodily incorporating the structure/design of one reference into the structure/design of the other reference. However, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
